

ITEM 2

June 2, 2008

Nathan Lishman
Amador County Planning Department
810 Court Street
Jackson, CA 95642

Subject: **Parking Analysis-2008**

Mitigation Measure 4.7 (d)

Kirkwood Mountain Resort will prepare an annual report that includes a detailed analysis of day-visitor parking during peak periods during the ski season, summer and special events when more than 4,000 day-use visitors are at the resort.

Dear Nate,

This is an analysis of the parking statistics for the peak days in the 2007/08 season. No parking shortages were experienced during the 2007/08 ski season and the resort easily parked above the 2,500 car minimum.

Included in this report is a map which has been generated to help show how cars were parked during the season. The map depicts a total of 3,168 parking spaces available with the current parking lot configuration. 71 of these spaces are reserved easement parking spaces which leaves a total of 3,097 parking spaces available for visitors to the resort. The peak day parking of this past season was on January 12, 2008 when we parked 2,916 cars.

Copies of parking counts collected in the field are included which show the individual parking lots and how many cars were parked in each lot on each of the peak days.

Below is a summary of this years peak days. For comparison, I have included last year's peak days as well.

Michael Richter

A handwritten signature in cursive script that reads "Michael Richter".
