# Request for Proposals

## Request for Proposals El Dorado County Air Quality Management District Motor Vehicle Emissions Reduction Electric Vehicle Charging Station Projects 2017

The El Dorado County Air Quality Management District (AQMD) is pleased to announce the release of a Request for Proposals (RFP) for electric vehicle charging stations. These stations will be funded in part with DMV AB 2766 Motor Vehicle Emissions Reductions revenue. Approximately \$175,000 is anticipated to be available for projects at up to \$5,000 per charger. Matching funds must be provided in the form of grantee-provided electricity, designation of parking spaces, and availability for public use.

The grant is competitive, based primarily on cost-effectiveness (\$/ton emissions reduced) and Board preference. The deadline to submit applications is **April 28, 2017** at 5 PM.

El Dorado County exceeds the National Ambient Air Quality Standards (NAAQS) for ozone and small particulate matter (PM<sub>2.5</sub>). Ozone is formed by reaction of organic gases (ROG) and nitrogen oxides (NO<sub>x</sub>) in the presence of sunlight. NO<sub>x</sub> is also contributes to the formation of PM<sub>2.5</sub>. All three pollutants are found in motor vehicle emissions. AQMD's goal in this RFP process is to identify projects that provide significant motor vehicle emission reductions at the lowest cost per ton of emissions reduced. This grant is intended to subsidize emissions reduction projects, not supplant existing normal operating expenses.

The complete RFP packet, Application, and information on previously funded projects, can be viewed under the "AB 2766 (DMV Fees) Motor Vehicle Emissions Reduction Grant" section on the AQMD's website at:
