COUNTY ROADWAY PAVEMENT CONDITION INDEX

Supervisory District 1
Conditions as of June 1, 2023

The condition of every roadway in the County is evaluated, on average, every two to three years. The condition assessment process that the County uses is statistically based, nonbiased, and impartial. The process provides a consistent and accurate method for comparing pavement conditions throughout the County. A roadway's condition is ranked on a scale of one to one hundred.

A Pavement Condition Index (P.C.I.) of 70-100 is considered Good
A Pavement Condition Index (P.C.I.) of 50-69 is considered At Risk
A Pavement Condition Index (P.C.I.) of 25-49 is considered Poor
A Pavement Condition Index (P.C.I.) of 0-24 is considered Failed

Since roads are inspected on a two to three year cycle, not all Pavement Condition Index rankings reflect current values.

Many El Dorado County roads are divided into sections based on different ages of construction, different maintenance treatments such as overlays or chip seals, and political boundaries such as city limits and supervisorial districts.

Roadway Pavement Condition Index

Supervisory District 1 Alphabetical Listing
