

CQI Learning Points

Meeting Date: January 10, 2018

Nice job!

- MPI on Christmas day went well. Good communication between multiple departments under difficult circumstances.
- It was provided that the Sac Metro copter has lighting and long line capability for night extrication.

Documentation

- Please make sure all 12 leads are attached to the PCR within Image Trend.
- Try to attach PCS and Face Sheets before you post. Please use the take picture now (camera icon).
- A valid address needs to be documented in the PCR. At this time billing does not have access to find these addresses.
- Frequent Flyer: please use lookup name and birthdate to minimize duplicate patients.

12 leads

Make sure all receiving centers are programmed into you monitors. Please send all STEMI EKGs to the receiving center that you are going to even if they are not a STEMI receiving center along with Marshall.

Annual Update

Annual update Days for west slope:

0900-1300

May 14, 16, 18

Wall Times

When transporting patients to out-of-county facilities and you experience extended wall times, please inform the Charge Nurse at the receiving facility every 20 minutes that you are from out-of-county. If you still need to provide treatment follow El Dorado County protocols.
