933 Eloise Avenue South Lake Tahoe, CA 96150

Liberty Utilities, AT&T, and Charter Communications are pleased to announce that Curtis and Sons, Inc. has been selected as the excavation contractor for the Apache Avenue Rule 20 project. Installation of conduit and underground boxes will begin later this month. Please note that panel conversion from the existing overhead service to underground will not occur until the summer of 2020.

Attached you will find a tentative construction schedule for the project. Please note that this is a tentative schedule; actual construction dates may shift due to weather or unanticipated delays. The utilities have asked Curtis and Sons to provide additional notification to each resident prior to starting excavation on private property. This supplemental notification may be made verbally or by door hangers, and will occur at least 48 hours in advance of excavation on private property.

Additional information about the project can be found on the El Dorado County website: https://www.edcgov.us/government/dot/tahoeengineering/pages/apache_underground_district.aspx

El Dorado County, Liberty Utilities, AT&T, and Charter appreciate your patience and cooperation during construction. Should you have questions or comments during construction, please contact Andrew Gregorich at 530-543-5278. You may also contact me at the number shown below.

Sincerely,

John Perra

Project Manager
