**Re:** Technical Memorandum #5: Traffic Count and Transit Ridership Data  
El Dorado County Travel Demand Model Update

**Date:** October 14, 2012  
Revised August 26, 2013

---

The purpose of this memorandum is to present information on the compilation of traffic count and transit ridership data for the on-going update to the El Dorado County (EDC) Travel Demand Model (TDM). This data, collected from EDC, Caltrans, and El Dorado Transit, will be used for TDM calibration and validation purposes. As previously established through prior project deliverables and discussions, the year 2010 has been identified as the base year for the TDM update. Given the nature of data sets, some recent data may require adjustment to reflect base year conditions.

Traffic count data was obtained from EDC for the five year period between 2007 and 2011<sup>1</sup>. This data, which is not seasonally adjusted, is sorted alphabetically with each count location assigned its own “station” identifier (see Attachment A). Additional year 2010 traffic count data were obtained from Caltrans for the State highway facilities (US-50, SR-49, and SR-193)<sup>2</sup>. Finally, recent traffic count data was compiled for areas outside EDC, primarily within Sacramento County, for use in the development of external station matrices and the calibration and validation of TDM links outside of EDC. Of the twenty-six (26) identified locations outside of EDC, recent data was not readily available for eight locations.

Transit ridership data was obtained from El Dorado Transit after the original preparation of this memorandum. The data is provided in **Appendix B** to this document. This data was used to validate the TDM as described in Technical Memorandum #9.

Census Transportation Planning Products (CTPP) data per the US Census Bureau’s American Community Surveys (ACS) 2006-2008 3-year data was utilized to obtain worker flow data for El Dorado County and the surrounding counties. This data will be used during future model development activities to assist with proper validation and calibration of the EDC TDM. The following data summarize key travel characteristics for trips originating from, or having destinations within El Dorado County.

- As reflected in **Table A** and **Exhibits A1** and **A2**, approximately twice as many El Dorado County workers stay within the County (48,365) compared to those who work in Sacramento County (24,620).

---

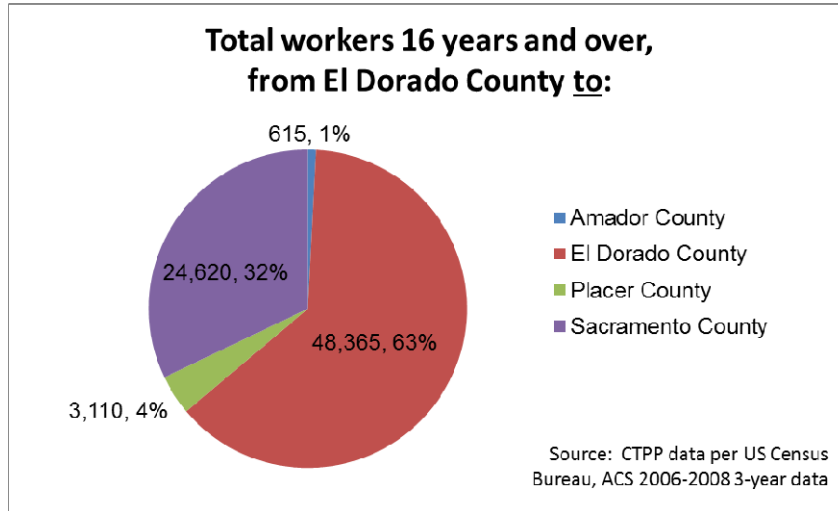

<sup>1</sup> Email from Michael Mayfield, El Dorado County Department of Transportation, April 18, 2012.

Sacramento County	1,465	24,620	46,205	507,045

**Exhibit A1 – Total Workers from El Dorado County**

**Exhibit A2 – Total Workers from El Dorado County**

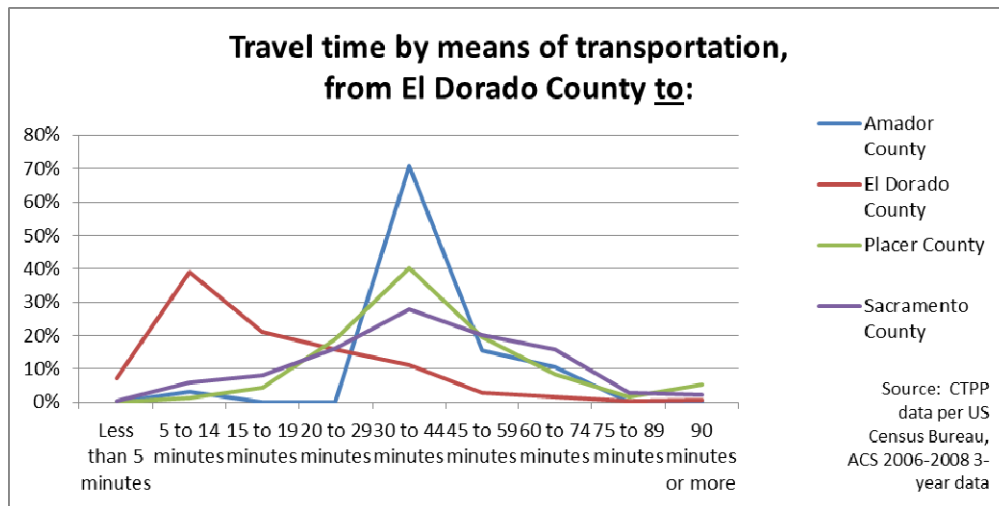

- Data on workers' means of transportation between EDC and the three adjacent counties provide additional information regarding worker proximity to work, and their travel behaviors. While those that drove alone (either in a car, truck, or van) dominate the behavior, it is clear from the data that the region's workers use a variety of means of transportation. This data is reflected in **Table B**. Note that the "Streetcar or trolley car" and "ferry" headings provided within this database incorrectly identifies the existence of trips and for that reason was removed.

**Table B – Means of Transportation**

- Travel times to work provide additional information about travel behavior. **Exhibits C1** and **C2** provide travel time data for workers leaving and entering El Dorado County. General conclusions from this data include the fact that internal El Dorado County trips are shorter than those employment trips destined for areas outside the county. Additionally, commute times to/from Amador County, while fewer in magnitude, are noticeably longer than other inter-County worker trips.

**Exhibit C1 – Travel Time from El Dorado County**

**Exhibit C1 – Travel Time to El Dorado County**

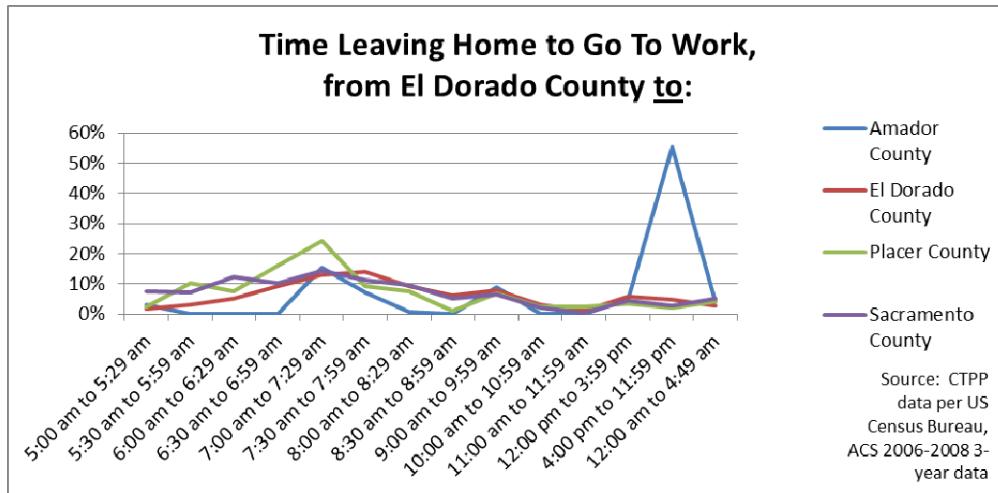

- Supplemental to the above travel time is the time workers leave home to go to work. **Table D** and **Exhibits D1** and **D2** depict the time leaving home data.
