Re: NOTICE OF PESTICIDE APPLICATION

Dear Partner Agency,

Effective November 1, 2011, a permit became required by the State Water Quality Control Board to apply pesticides to waters of the United States. The County of El Dorado has a permit in place for this requirement. The County plans to begin pesticide applications for the 2015 vector season during the week of April 27th. We will be operating under the Statewide National Pollutant Discharge Elimination System (NPDES) Permit for Biological and Residual Pesticide Discharges to Waters of the United States from Vector Control Applications (WATER QUALITY ORDER NO. 2011-0002-DWQ). Under this permit, the District is required to notify potentially affected governmental agencies of the following:

1. The District intends to apply one or more public health pesticides to or near areas under your agency's jurisdiction, if necessary, to limit risks to public health posed by mosquitoes and mosquito borne disease such as West Nile Virus.
2. The pesticide active ingredients that may be applied are allowed under the General NPDES Permit for Biological and Residual Pesticide Discharges from Vector Control Applications. See attached list.
3. The purpose of any application will be to reduce mosquito abundance and/or mosquito borne disease levels detected in the application area, as part of the district's integrated pest management program.
4. Applications may occur any time of the year. Typically the applications are made between April 1st and November 30th at appropriate locations within El Dorado County.
5. For more information, here are the best ways to contact us:
