

Attachment A

Applicable General Plan Objectives and Policies

OBJECTIVE 2.2.2: OVERLAY LAND USE DESIGNATIONS

Establishment of overlay designations to provide additional direction for the development of land where circumstances apply generally to the lands regardless of the underlying land use designations.

Policy 2.2.2.1 The following General Plan overlay designations are included:

- A. Agricultural Districts
- B. Platted Lands
- C. Ecological Preserve
- D. Mineral Resource
- E. Important Biological Corridor

Policy 2.2.2.4 The purpose of the Ecological Preserve (-EP) overlay designation is to identify those properties in public or private ownership which have potential to be established or have been established as habitat preserve areas for rare or endangered plant and animal species and/or critical wildlife habitat and/or natural communities of high quality or of Statewide importance and/or Stream Environment Zones (SEZ) as established in the Tahoe Basin. Ecological preserves may be established by private contract and/or memoranda of understanding affecting interested public agencies.

- A. The Ecological Preserve overlay designation shall be combined with a basic land use designation that is appropriate for the area. The overlay will enable the land use densities or building intensities for a discretionary project to be transferred to other lands, clustered, or otherwise mitigated to maintain the Preserve.
- B. The implementation strategies for the designated Ecological Preserve overlay lands shall be developed and approved by the Board of Supervisors prior to the designation taking effect. Implementation strategies shall not change the base land use designation.
- C. Within the Tahoe Basin, the Ecological Preserve overlay shall apply to SEZ as established by Section 37.3 of the Tahoe Regional Planning Agency Code of Ordinances.

OBJECTIVE 7.4.1: RARE, THREATENED, AND ENDANGERED SPECIES

The County shall protect State and Federally recognized rare, threatened, or endangered species and their habitats consistent with Federal and State laws.

- Policy 7.4.1.1 The County shall continue to provide for the permanent protection of the eight sensitive plant species known as the Pine Hill endemics and their habitat through the establishment and management of ecological preserves consistent with County Code Chapter 17.71 and the USFWS's *Gabbro Soil Plants for the Central Sierra Nevada Foothills Recovery Plan* (USFWS 2002).
- Policy 7.4.1.2 Private land for preserve sites will be purchased only from willing sellers.
- Policy 7.4.1.3 Limit land uses within established preserve areas to activities deemed compatible. Such uses may include passive recreation, research and scientific study, and education. In conjunction with use as passive recreational areas, develop a rare plant educational and interpretive program.
- Policy 7.4.1.4 Proposed rare, threatened, or endangered species preserves, as approved by the County Board of Supervisors, shall be designated Ecological Preserve (-EP) overlay on the General Plan land use map.
