Exhibit A
Criteria for Reduction of Minimum Parcel Size Agricultural Buffer Requirement of Policy 8.1.3.1

Pursuant to the 2004 General Plan Policy 8.1.3.1, the County Agricultural Commission may consider recommending to the approving authority the creation of a parcel(s) less than 10 acres adjacent to agriculturally zoned lands when the Commission finds that the following exists:

A. The project meets each of the following criteria:

1. The parcel is assigned an urban or other nonagricultural use in the Land Use Map for the 2004 General Plan; and
2. The proposed parcel size is consistent with the General Plan Land Use designation; and
3. The proposed parcel size will not intensify conflict with an adjacent agricultural operation; and

B. The project meets at least one of the following criteria:

1. The parcel adjacent to the agriculturally zoned land is within an existing General Plan Community Region or Rural Center and will not intensify conflict with an adjacent agricultural operation; or
2. The agriculturally zoned parcel is zoned Exclusive Agriculture (AE) or Agricultural Preserve (AP); and
 - a. The agricultural parcel is no longer under contract and the Agricultural Commission determines that the surrounding parcels are residential/nonagricultural in nature and are not suitable for an agricultural operation; or
 - b. The parcel was assigned an urban or other nonagricultural use in the Land Use Map for the 1996 General Plan(LDR, MDR, HDR, MFR, C, TR, RD, AP or PF); or
3. The agriculturally zoned parcel is less than 10 acres in size and is not being used for agricultural operations; or
4. The Agricultural Commission determines that the surrounding parcels are residential/nonagricultural in nature and are not suitable for an agricultural operation; and

C. The project meets one of the following criteria:

1. The agriculturally zoned land area contains less than 20% choice soils; or
2. There is currently no agricultural activity on the agriculturally zoned parcel(s) adjacent to the subject parcel and that the conversion to a low or high intensive farming

operation is not likely to take place due to soil and/or topographic characteristics of the adjacent agriculturally zoned parcel(s).
