**EL DORADO HILLS BOAT, WINE & SELF STORAGE, LLC
EL DORADO COUNTY - SPECIAL USE PERMIT REVISION
1120 SUNCAST LANE, EL DORADO HILLS, CA 95762
EL DORADO COUNTY APN: 108-250-34**

PROJECT DESCRIPTION

Location: The subject property is located at 1120 Suncastr Lane in El Dorado Hills, California. It is on the South side of the road approximately 200 feet East from the intersection of Suncastr Lane and Golden Foothill Parkway in the El Dorado Hills Business Park.

Existing Conditions / Background: The 3.51-acre property currently has one large building used for boat, RV, trailer, and self-storage. The property is within the Research & Development (R&D) Zone of the El Dorado General Plan. The current use is Mini-Storage, which is considered a Special Use with the R&D Zone. The property was issued a Special Use Permit (El Dorado County File No.: S02-37) on July 11, 2003.

In January 2008, Dave Ciapponi was elected as the Managing Member of El Dorado Hill Self Storage by the members of the LLC to replace the existing management that was failing. In May of 2008, Mr. Ciapponi filed for bankruptcy that concluded in January of 2010 with Mr. Ciapponi and some of the former members taking ownership to the assets of El Dorado Hills Suncastr Storage (EDHSS) in a new company called El Dorado Hills, Boat Wine & Self Storage LLC. The company was reorganized during the bankruptcy. Through the bankruptcy process it was discovered that the former managers had not applied for a business license to provide the boat sales & services that were occurring at the property. To rectify the situation a new business license was sought and issued under B.L. #041054 which was approved by the County in 2009.

This process was an attempt to legitimize all of the activities that were occurring at the property under the organization and direction of previous management. For the last 4.5 years under direction of Mr. Ciapponi the Goldkey Boat Storage has operated a service business at 1120 Suncastr Lane. The LLC has requested, and been granted approval to continue this business from the Business Park in which the property is located.

The current owner was issued an El Dorado County Business on February 13, 2008 to allow for Sales/Rentals/Repairs & Towing of Boats in addition to Moving & Storage. A subsequent business use was added on November 12, 2009 to allow for boat winterization and summarization including fuel stabilizing, draining water, and detailing of boats. Per El Dorado County Ordinance Section 17.35.020 this use is allowed by right with all activity contained within the building.

EXHIBIT E

Project Description: The owner proposes to modify the existing Special Use Permit in order utilize the current building to allow for:

1. Marine vessel and non-automotive vehicle service repair, including but not limited to the following:
 - Fluid changes & tune-ups
 - All component diagnosis & repair
 - Engine/Drive repair and replacement
 - Detailing
2. Sales of new and used marine vessels & non-automotive vehicles including but not limited to:
 - Includes boats, tow-behind trailers and accessories
3. Sales of parts and retail items related to boating and non-automotive recreation out of the existing Ship Store including but not limited to:
 - Engine, hull and trailer equipment and parts
 - Boating accessories
 - Batteries & Maintenance Supplies

All of the above uses will be performed within the existing facilities. In order to comply with the El Dorado Fire Department conditions the project has been authorized to install a gasoline convault at the rear of the property to store fuel to maintain 95% full tanks of the boats in storage. A flammable liquids locker will be installed on the interior of the building within the proposed service area to store small amounts of gasoline (20 gallon maximum), oil, and other flammable liquids related to boat maintenance. The facility will continue to store Recreational Vehicles (RV's) in the aisles of the boat storage area and shall not exceed 2,000 square feet of area per aisle. All spacing requirements for the RV's will be adhered to per El Dorado Fire Department requirements. In an effort to secure the site the access gates will be moved from the rear of the existing building to the front with both vehicular and pedestrian access. The existing property line fencing will be extended along both the western and eastern property lines to connect with the relocated access gates. The access code will be given to the waste management company to allow for access to the existing trash enclosure.

Operation: The facility is open 8 am to 8 pm, 7 days a week. The facility has a total of six (6) employees with varying schedules. The boat storage utilizes a forklift to store and move boats in and out of storage.

Parking Demand: Per Section 17.18.060 of the Zoning Ordinance the originally approved project calculated parking spaces with using standards for Office, Self Storage and Boat Storage. The project required 39 parking spaces and provided a total of 40 spaces including the required accessible spaces.

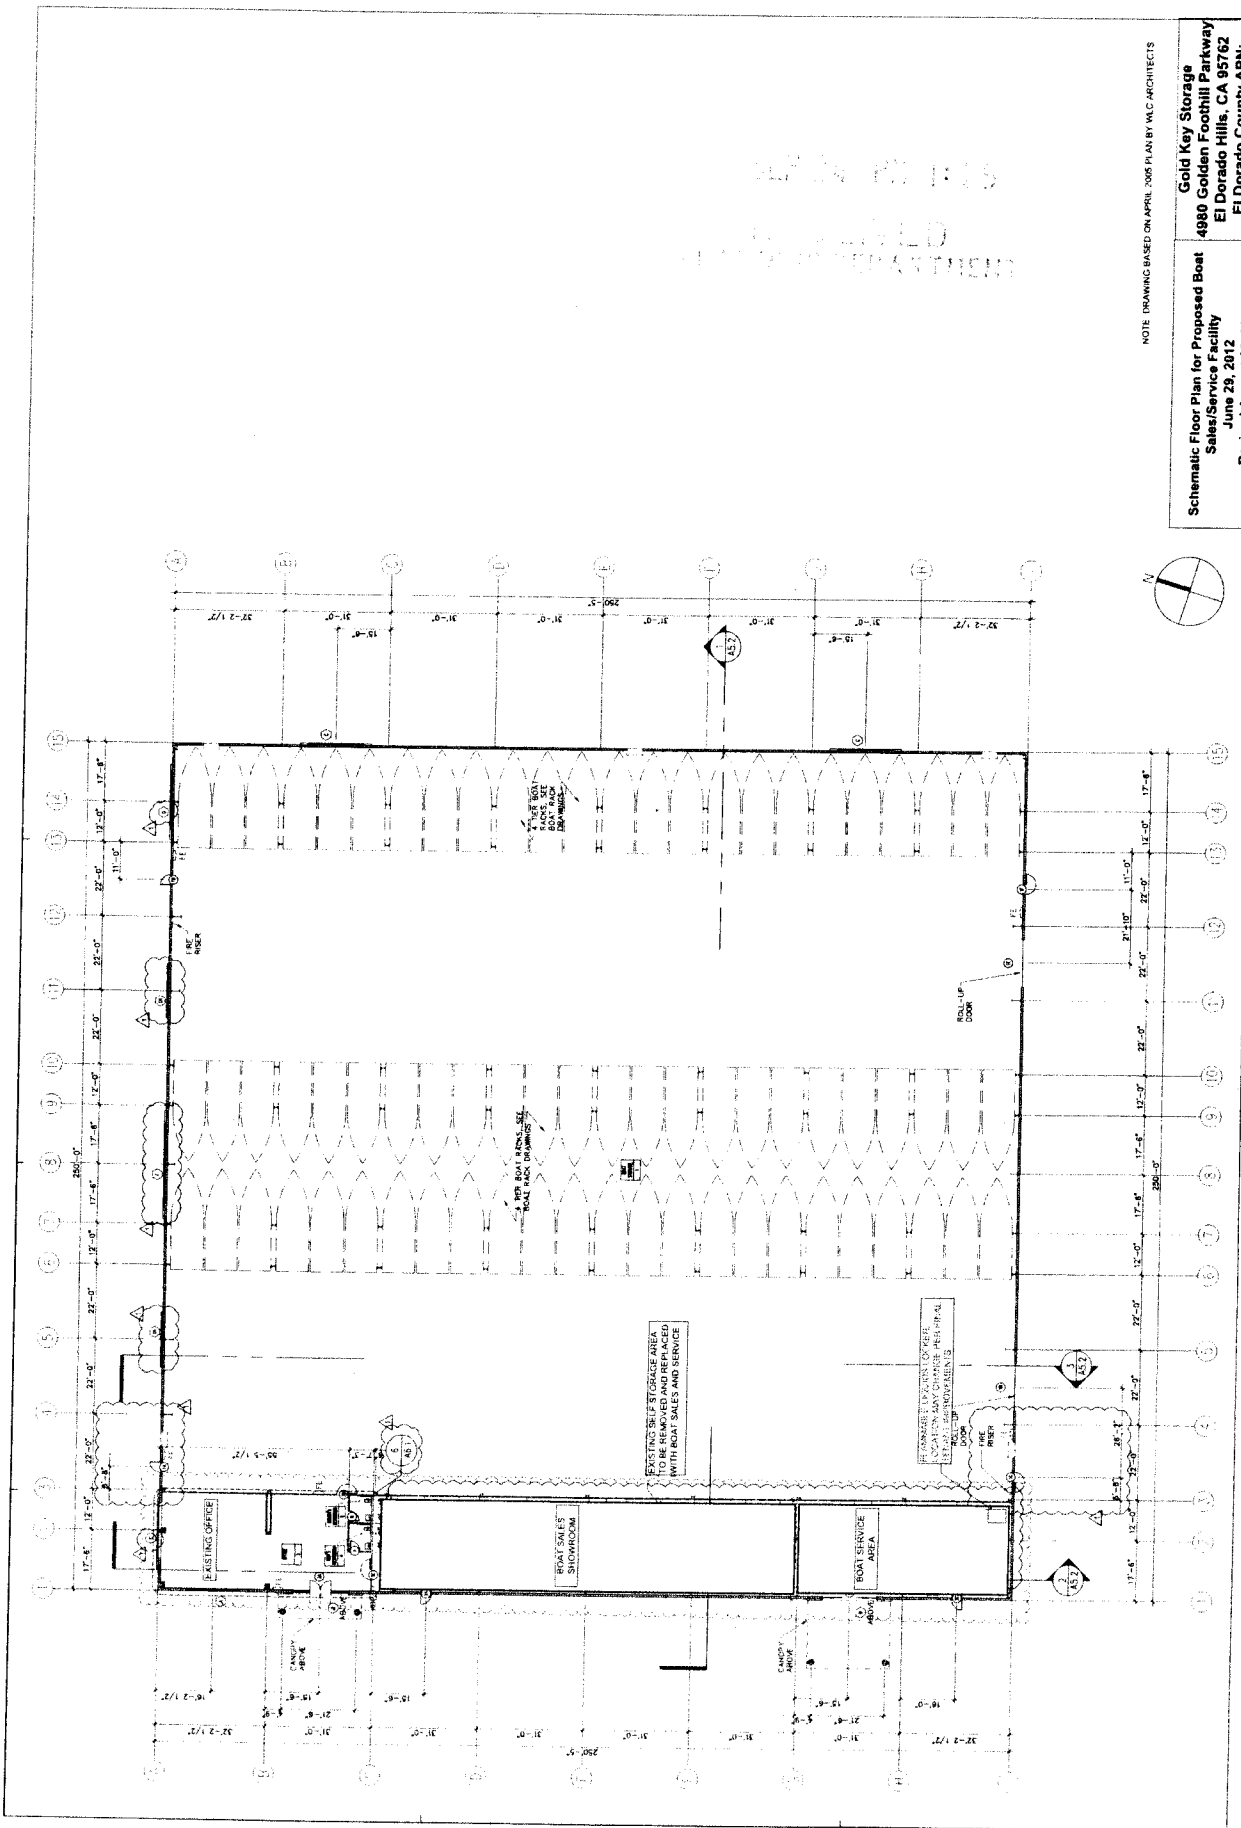

The revised uses will still include office, retail sales, boat sales, boat storage, and boat service. The proposed parking requirements are based on the commercial requirements associated these uses and total 34 required spaces as calculated in Table 1 below:

Table 1 - Parking Standards

Use	Square Footage	Parking Requirement	Parking Provided
Boat Sales	2,700	1 space/500 gross sales area	5 spaces
Boat Service	1,877	3 spaces/ service bay	6 spaces
Office	2,195	1 space/250 gross floor area	9 spaces
Retail Sales	600	1 space/ 300 square feet	2 spaces
Boat Storage	360*	1 space/ 30 units	12 spaces
Totals			34 spaces

*Boat storage number of units

The site currently has a surplus of six (6) parking and does not foresee the need for additional parking.

Gold Key Storage CONTINGENCY PLAN

- A. MATERIAL HANDLING** - Describe how hazardous materials are handled at your facility. For example: are they stored until sold, burned as fuel, used in a manufacturing process, etc.

New/unused oil and other engine fluids (i.e. transmission fluid) are stored inside the facility and accessed only when needed. Used engine fluids will be removed from boat engines and drained into a temporary storage container. The temporary storage containers will be emptied into larger storage containers outside of the building. The final container will be emptied for recycling or disposal by a third party certified for appropriate recycling/disposal methods.

Gasoline is stored within 109 gallon tank service truck parked at the facility. The truck is moved to fill boats as needed. The truck is filled at a commercial filling station.

New marine batteries are stored inside of the facility on a pallet and accessed only when necessary. New marine batteries will be installed into boat and the used marine batteries will be removed and stored within the facility until transported by a third party certified for appropriate recycling/disposal methods.

- B. SAFETY ORGANIZATION** - If your business has a department or an individual responsible for safety, then please indicate the organizational structure of that department here or that person's name here.

Dave Ciaponni, the owner of the facility, is responsible for safety.

- C. RELEASE CONTAINMENT PROCEDURES** - Describe how you deal with a large hazmat spill or release at your facility.

If a large hazmat spill occurs on site (i.e. leak of outdoor fluid storage) pre-appointed employees with proper training will provide temporary containment measures such as absorption pads and oil booms. The managing employee on site will contact the pre-determined appropriate authorities (list of authorities to be posted on site).

D. EQUIPMENT I - List any personal safety equipment that you may have on hand (respirators, gloves, coveralls, etc...)

Equipment	Storage Location
<i>Gloves</i>	<i>Inside office</i>
<i>Eye protection</i>	<i>Inside Office</i>
<i>Eye washing station</i>	<i>Inside facility</i>
<i>Coveralls</i>	<i>Employee responsibility</i>
<i>Emergency Medical Kit</i>	<i>Inside facility</i>

E. EQUIPMENT II - Control and Cleanup equipment (absorbent materials, kitty litter, shovels, empty containers, etc...)

Equipment	Storage Location
<i>Abosorbtion pads</i>	<i>Inside boat maintenance area</i>
<i>Oil booms</i>	<i>Inside boat maintenance area</i>
<i>Empty storage containers</i>	<i>Inside boat maintenance area</i>
<i>Kitty litter</i>	<i>Inside boat maintenance area</i>

F. EQUIPMENT III - Monitoring equipment (gauges, meters, pH paper, etc...)

Equipment	Storage Location
Dipstick for storage containers	On storage containter

G. EVACUATION - Number of employees per shift: 5 Shift hours: 8-10
Method of employee notification (verbal, loudspeaker, radio, telephone, etc...)
Employees will be receive radio and verbal notification.

Evacuation routes (if indicated on facility map so state, otherwise describe) where should employees assemble in order to be counted?

Evacuation routes are posted on the facility map. Employees are to gather near the fire hydrant located at the northwest corner of the property.

H. ADJACENT AREAS - Identify surrounding structures within 2000 feet of your facility (schools, hospitals, residential, commercial, or open space).

North: Commercial

South: Open Space

East: Commercial

West: Commercial

TRAINING PLAN

State law requires that businesses must provide initial training and annual refresher training to all employees who handle hazardous materials and wastes. Records of the training sessions must be kept onsite. The training program shall at a minimum include the following:

- 1) Methods for the safe handling of hazardous materials.
- 2) Material safety data sheet use and location.
- 3) Procedures for contacting local emergency response agencies.
- 4) Proper use of all emergency response/spill cleanup equipment stored onsite.
- 5) All other aspects of this hazardous materials business plan.

SIGN UP SHEET

The following employees have received the appropriate training as outlined above.

SIGNATURE OF EMPLOYEE

DATE

Person responsible for training: Dave Ciapponi

EMERGENCY NOTIFICATION PROCEDURE

State and Federal laws require that the agencies listed below must be notified immediately whenever a hazardous materials spill or release occurs which presents an immediate threat to the health and safety of employees, the public or the environment. When in doubt, make these notifications:

- | | |
|--|-----------------|
| 1) Fire/Law/Medical | 9-1-1 EMERGENCY |
| 2) Environmental Management Department -
Placerville Division | (530) 621-5300 |
| South Lake Tahoe Division | (530) 573-3450 |
| 3) State Warning Center | (800) 852-7550 |
| 4) National Response Center* | (800) 424-8802 |

When calling to report a release or a spill, be prepared to provide the following:

- a. Nature of the incident (spill, explosion, fire, etc.)
- b. Give the name of the hazardous material(s) involved and the approximate quantity.
- c. Estimate the number of injuries and cause of injuries or contaminated individuals.
- d. Location of the incident.
 - o Name the street or road.
 - o Building number.
 - o Name the nearest cross street.
- e. Your name.
- f. Safe location near incident where the emergency responders can meet contact person.

You should then be prepared to perform the release containment procedures outlined in Part C of the emergency planning section of your business plan. Follow up written release reports must be made by all businesses to all agencies listed above.

Post these notification procedures where all employees can see them.

* Many chemicals have reportable quantities set by federal law in 40CFR302.4. Those quantities can be accessed via the Federal Government Printing Office website at <http://www.gpoaccess.gov/cfr/index.html>. If you have a release that exceeds these quantities, you must notify the National Response Center.

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As" that might have been used in the past.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
4. HAZARDOUS MATERIALS -
Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:
 - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
 - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
 - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.
Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.
- 4a. REGULATED SUBSTANCES - Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.
5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) 25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC 25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):
 - An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC 25270.2 (k)) is not subject to this act and is exempt:
 - A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
 - A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
 - An aboveground oil production tank which is regulated by the Division of Oil and Gas,
 - Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.
9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC 25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC 25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler. You do not need to report.
11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC 25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC 25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.
12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR 67450.13 (b) and HSC 25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:
 - Your knowledge of the tank and its contents
 - Testing of the tank
 - Inability to remove hazardous materials stored in the tank.
 - The mixture rule
 - The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.
- 14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.
- 14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.
15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.
